PROCESSING ACTION

TO	Chief, [REDACTED]	MARKED FOR INDEXING	12
INFO.	[REDACTED]	NO INDEXING REQUIRED	15
FROM	Chief, KUCLUB	ONLY QUALIFIED DESK CAN JUDGE INDEXING	
SUBJECT	Expansion of Staff Communications Capability [REDACTED]	MICROFILM	
ACTION REQUIRED - REFERENCES			

1. Our fiscal year 65 and 66 programming for [REDACTED] is (and will be) based on its assuming a much larger staff communications role without in any way detracting from its [REDACTED]

2. We foresee [REDACTED] having three major functions:

B. Crypto relay point for [REDACTED] outstations and emergency radio base for these stations. Concurrent with this, normal and emergency radio relay and in some cases crypto guard point for [REDACTED]

C. Radio base for additional [REDACTED] stations as circumstances may require.

As you can readily see this is rather a large order.

3. We have sufficient information relative to B and C above to allow realistic programming of equipment, facilities and personnel to meet these requirements both current and projected. We also are able to determine the equipment, facilities and personnel necessary to meet A as we understand your commitment from past plans. We do not know what effect your present combining and reducing of [REDACTED] positions will have on total equipment and facilities (antennas). For example, if you are able to combine three positions into one; does this free the transmitters, receivers and transmitting/receiving antennas for other use, [REDACTED] In order to complete our programming, and not over or under estimate, we need a recap from you of your requirements versus capability (hardware) on the [REDACTED] with a breakout position by position. Also include your current staff requirements. Ideally we will receive something on the order of a list showing each position or staff circuit with its associated equipment identified and a bottom line figure of either an excess or shortage of equipment and/or antennas.

4. At the same time

4. At the same time we would appreciate your views as to whether or not construction of a new [] should be considered, and if so what form should it take, i.e. build a new building around and over the existing plant, move away 200 yards and build a new building, etc. On this same theme include rough drawings of your ideas for a new [] both as to basic configuration and area/equipment layout. Please keep in mind that this is a relatively long range plan since FY-1967 is the earliest year that funds could be programmed for this facility.

5. In the meantime, we will come up with some ideas and drawings of our own upon receipt of the information requested in paragraph three.
